Your partner for system solutions

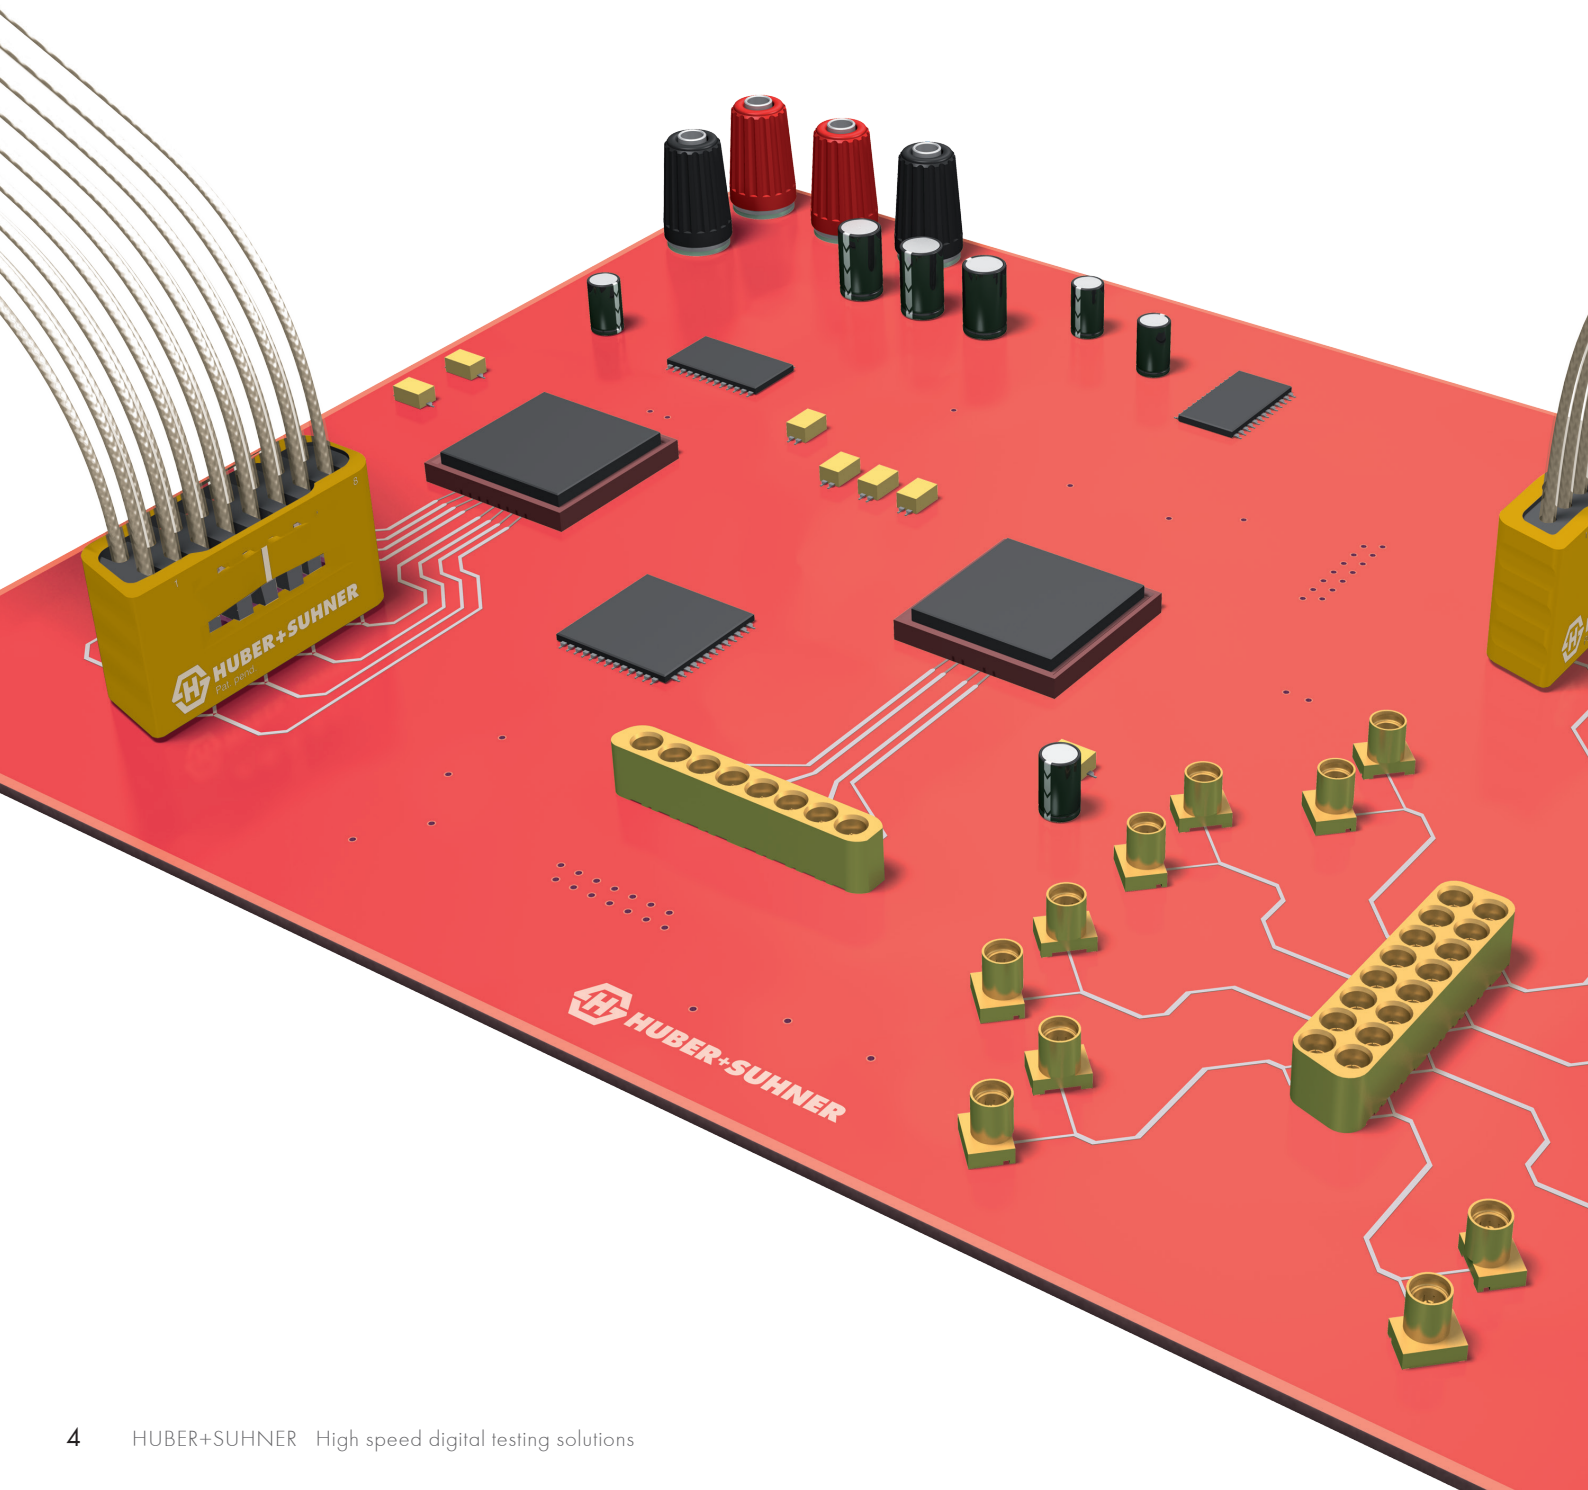

HUBER+SUHNER is a leading international manufacturer and supplier of components and systems for electrical and optical connectivity. HUBER+SUHNER unites technical expertise in radio frequency technology, fiber optics and low frequency under one roof and offers a high-quality product range for the communication, transport and industrial markets.

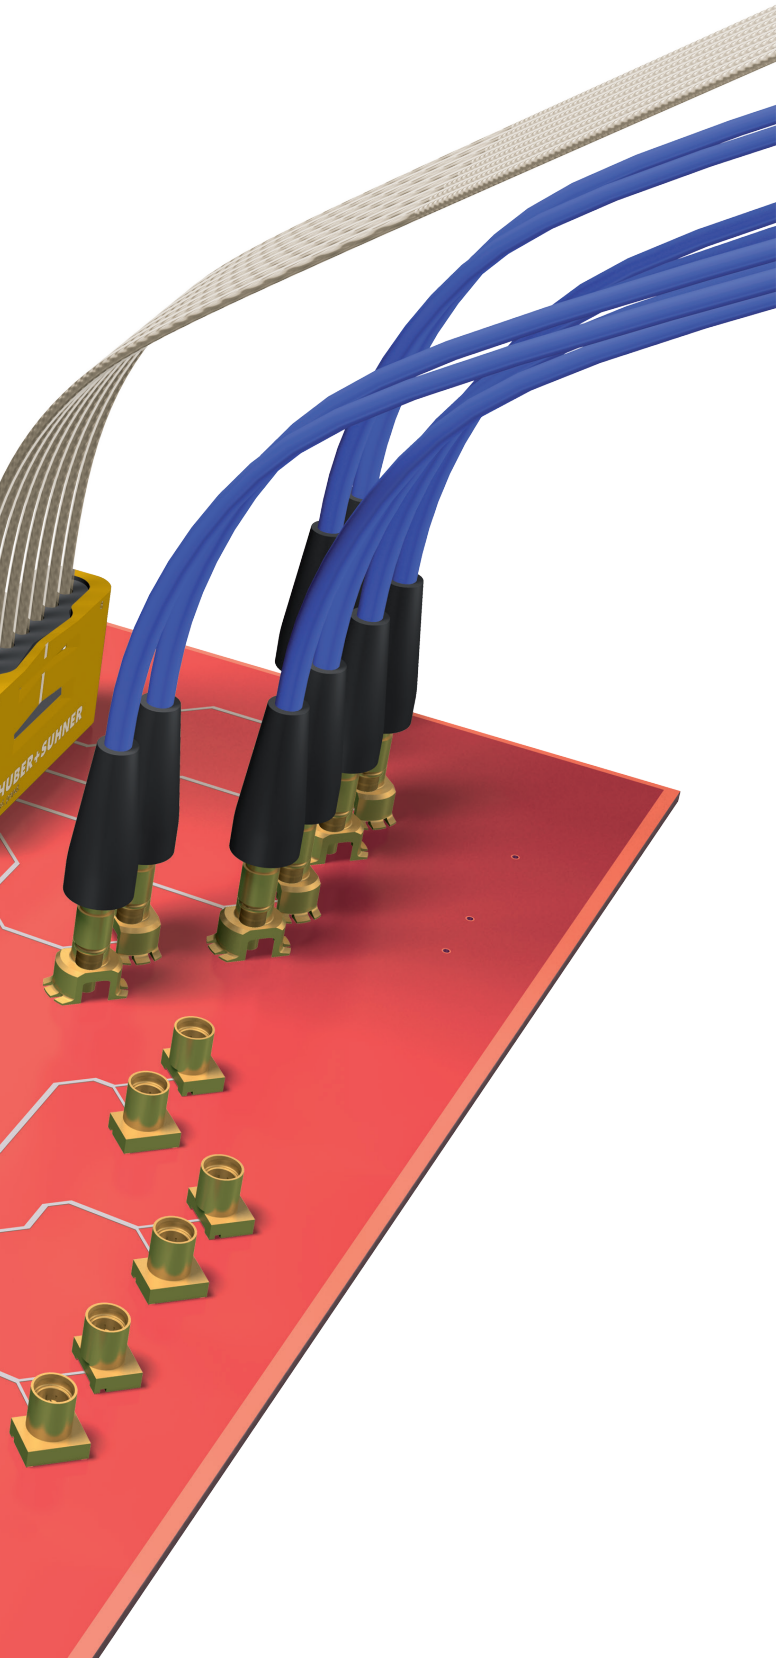

The innovative high speed digital testing solution supplier

HUBER+SUHNER is offering a broad range of high end RF test components and assemblies developed and optimised for high speed digital testing. We stand for highest density, lowest loss and highest performance coaxial-to-PCB transitions and cabling solutions. Our solutions include extensive technical support, libraries of 3D files, electrical modelling data and customer specific optimised footprints.

HUBER+SUHNER
Excellence in Connectivity Solutions

What high speed digital testing demands

High speed digital chip verification – bench top testing

- Lowest loss from the device under test to the test equipment
- Best signal integrity performance
- Dense and space saving PCB connectivity solutions
- PCB connectivity closest to the device under test
- Proven and tested solutions and components

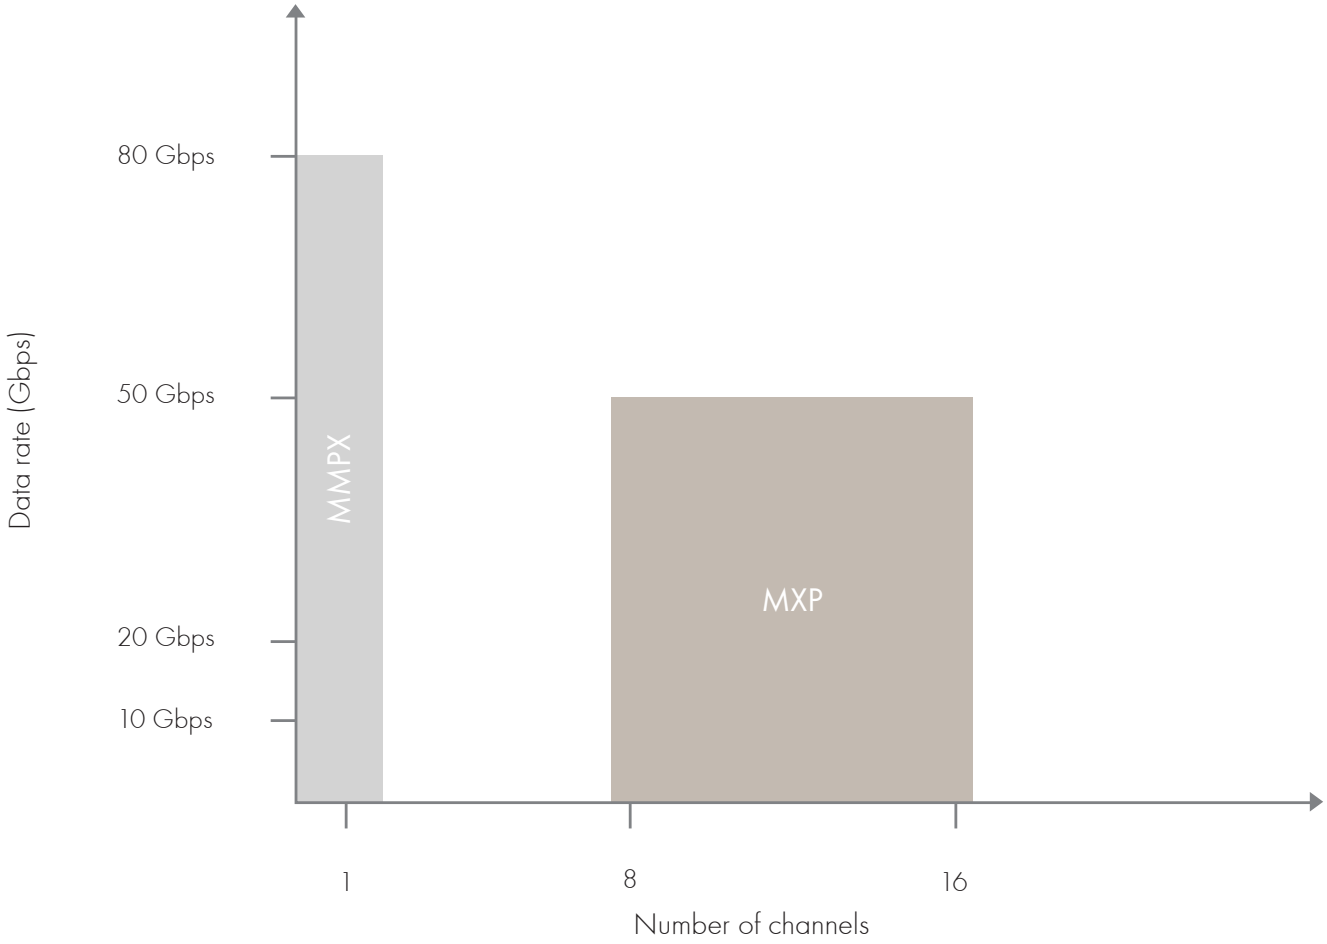

High speed digital hardware and system verification

Additional benefits regarding high speed digital systems
- Multicoax PCB edge mount and PCB panel mount solutions
- Multicoax interconnectivity between systems and modules with customised solutions

Automated test equipment

For internal and external interconnectivity of complex automated test equipment systems HUBER+SUHNER offers customer specific solutions based on
- Multicoax interfaces at up to 50 Gbps/50 GHz
- Snap-on interfaces at up to 80 Gbps/67 GHz
- RF cabling solutions optimised for highest data rates and frequencies, lowest loss, best phase matching and highest flexibility

HUBER+SUHNER high speed digital testing solutions overview

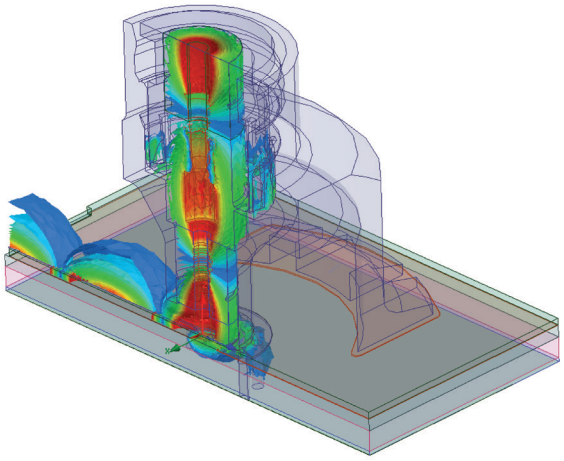

MMPX –
80 Gbps snap-on solution
for data rates at up to 80 Gbps and a maximum operating frequency of 67 GHz is based on
- MMPX connectors
- MULTIFLEX 86 HE and semi-rigid cable assemblies

MXP –
50 Gbps multicoax solution
for data rates at up to 50 Gbps and a maximum operating frequency of 50 GHz is based on
- MXP connectors
- MULTIFLEX 53-02 cable assemblies
- SUCOFLEX 100 cable assemblies

Service and support

Customised and optimised PCB footprints

HUBER+SUHNER is offering a professional design-in service for board connector footprints. By the use of three dimensional electromagnetic field simulators the optimal performance of the HUBER+SUHNER board connectors is provided to the customer.

Comprehensive design data

HUBER+SUHNER provides comprehensive design data collections to their customers:

3D files
For the exchange of CAD models between various CAD systems, HUBER+SUHNER is providing 3D files in IGS or STEP data format.

S-parameter files
Measured S-parameters of the HUBER+SUHNER components are available on request, offering the customers the possibility to include these components into their electrical simulations.

Application notes
A bunch of application notes and technical design guidelines for the HUBER+SUHNER solutions are available on request.

Non standard connectors

Although our standard assortment is broad and miscellaneous, there are customer requirements which need a special solution. Thanks to capabilities and years of experience, HUBER+SUHNER is the ideal partner when customised solutions are demanded.

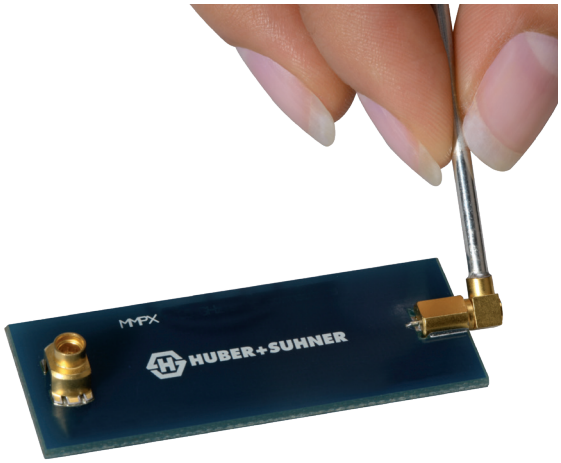

Repair service

HUBER+SUHNER is offering a retermination service for the professional replacement of defective channels. Your HUBER+SUHNER representative will guide you if you are in need of a repair and want to benefit from this opportunity.

MMPX – 80 Gbps snap-on solution

Key features

- True 67 GHz/80 Gbps coaxial-to-PCB transition
- Broadband characteristics from DC to 67 GHz
- Excellent return loss
- Excellent shielding, low cross talk
- Via-in-pad capable
- 5.08 mm pitch (0.2 inch)
- Mechanically robust design
- Extensive technical support

Benefits

- **Future proof design**
  Thanks to the broadband characteristics, the excellent return loss and the true 67 GHz coaxial-to-PCB transition, MMPX helps in developing future proof RF systems.
- **Quick and reliable mating**
  The MMPX snap-on mechanism is completely decoupled from the electrical path and therefore specifically optimised for quick and reliable mating.
- **Space saving**
  The minimal pitch on boards of 5.08 mm (0.2 inch) saves expensive board material (40 % smaller SMD footprint than SMP).
- **One connector for several applications**
  The unique electrical and mechanical performance as well as the compact form makes MMPX ideal for a variety of applications.
- **Overall cost saving**
  The attractive pricing, the extensive technical support including footprint service and the HUBER+SUHNER one-stop shop approach, minimises the overall costs for design-ins and trade procedures.

Benefits MULTIFLEX 86 HE cable

- Optimised regarding highest cut-off frequency, electrical loss and phase stability
- Flexible alternative to semi-rigid cables

minibend™ L

- Tight bending enabling easy access to PCB connectors in highly populated or limited clearance boards
- Better signal integrity through reduced losses

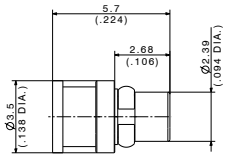

Comprehensive range of standard products

- Various PCB connector types (SMD)
- Adaptors between MMPX and PC 1.85 (1.85 mm standard) or SK (2.92 mm standard)
- Standard MULTIFLEX 86 HE cable assembly lengths with MMPX, PC 1.85 or SK (2.92 mm standard)
- Decoupling tools for easy and safe connector decoupling

MMPX – decoupling tools

«All-round» decoupling tool

This decoupling tool is suitable for all kind of MMPX combinations.

HUBER+SUHNER type	Item no.
74_Z-0-0-555	84020011

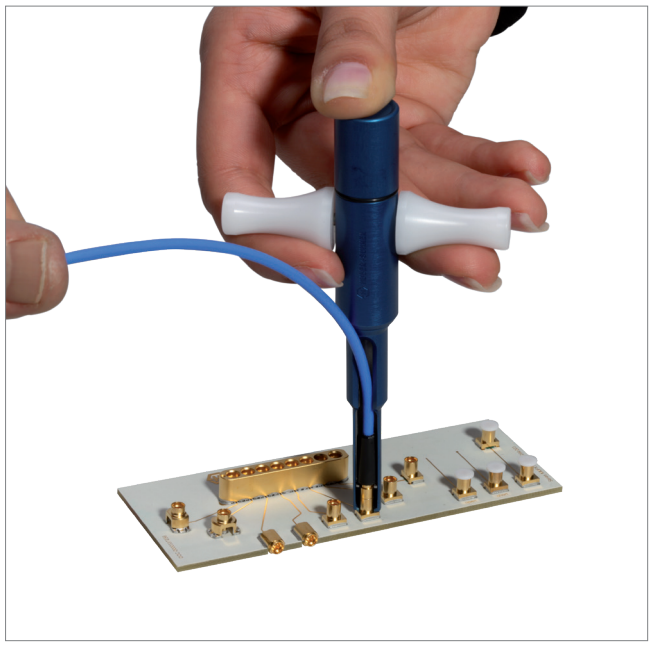

«PCB» decoupling tool

This high-end decoupling tool is especially suited for decoupling MMPX combinations when the PCB connectors are placed very close to each other. The anodised surface is non-conductive and helps to prevent short-cutting circuits on the PCB.

Note: Suitable for flexible cables only!

MXP50 – 50 Gbps multicoax solution

Solution

The HUBER+SUHNER 50 Gbps multicoax solution is based on a triplex approach:

- MXP PCB connector
  - connect your PCB with **maximum density** and **highest performance**
- MULTIFLEX 53-02 breakout assembly
  - go off the PCB with **maximum flexibility**
- SUCOFLEX 100 cable assembly
  - connect your measurement equipment with **lowest loss**

Features

- Dense MXP connectors allow multicoax connectivity close to the device under test
- Short MULTIFLEX 53-02 breakout assemblies provide highest flexibility and easy channel management while still providing low loss
- SUCOFLEX offers lowest loss interconnectivity to the test equipment
- Quick and reliable interconnection thanks to the Quick Mate coupling nut and the ergonomic grip on the MULTIFLEX 53-02 breakout assembly
- No torque wrench required

Benefits

- Highest density – lowest loss
- Fast and reliable mating
- Reduces total cost of testing

MXP50 – 50 Gbps multicoax solution

Key features
- Operating range at up to 50 Gbps/50 GHz
- Standard absolute phase matching down to ± 2 ps
- Highest density – lowest loss
- Slide-on mating – no threading
- Highly flexible and ultra stable MULTIFLEX cable
- Extensive technical support

Benefits
- **Testing at the highest stage**
  The broadband characteristics and the true 50 Gbps/50 GHz coaxial-to-PCB transition allow the design of evaluation boards (test set-ups) for the latest generation of semiconductor standards.
- **Space saving**
  Due to the dense interface pitch, the PCB connectors take up less space on boards. This is advantageous, as expensive high-performance board material is essential for good signal integrity at high data rates.
- **Shorter transmission lines**
  The compact design of the PCB connector allows it to be positioned directly adjacent to the DUT/chip. This helps to keep the transmission lines on the board short and the losses low.
- **Reliable push-on mating**
  Thanks to the revolutionary slide-on interface design, assemblies can be replugged quickly and easily, while guaranteeing stable electrical values even after numerous mating cycles.
- **Easy channel handling**
  The highly flexible MULTIFLEX cable in combination with a detailed numbering and coding system ensures easy channel handling without any degradation of the signal integrity.
- **Overall cost savings and service benefits**
  Reduced cost of ownership compared to single interfaces thanks to lower outlay for PCB population and channel handling. 3D files, modelling data and customised footprints are available upon request.

Comprehensive range of standard products (1 × 8 and 2 × 8 ganged systems)
- 1 × 8 and 2 × 8 straight PCB connectors (SMD)
- 1 × 8 and 2 × 8 breakout assemblies MXP-to-PC 2.4
- 1 × 8 and 2 × 8 jumper assemblies MXP-to-MXP
- Loop back assembly
- 2 × 8 MXP-to-MXP board-to-board adaptor
- Standardised SUCOFLEX assembly lengths with different classes of phase matching
- Customised assemblies on request

MXP40 – 40 Gbps multicoax solution

Key features
- Operating range at up to 40 Gbps/40 GHz
- Standard absolute phase matching down to ± 2 ps
- Highest density – lowest loss
- Slide-on mating – no threading
- Highly flexible and ultra stable MULTIFLEX cable
- Extensive technical support

Benefits
- State-of-the-art-testing
  The broadband characteristics and the true 40 Gbps/40 GHz coaxial-to-PCB transition allow the design of evaluation boards (test set-ups) for most of the existing semiconductor standards.
- Space saving
  Due to the dense interface pitch, the PCB connectors take up less space on boards. This is advantageous, as expensive high-performance board material is essential for good signal integrity at high data rates.
- Shorter transmission lines
  The compact design of the PCB connector allows it to be positioned directly adjacent to the DUT/chip. This helps to keep the transmission lines on the board short and the losses low.
- Reliable push-on mating
  Thanks to the revolutionary slide-on interface design, assemblies can be replugged quickly and easily, while guaranteeing stable electrical values even after numerous mating cycles.
- Easy channel handling
  The highly flexible MULTIFLEX cable in combination with a detailed numbering and coding system ensure easy channel handling without any degradation of the signal integrity.
- Overall cost savings and service benefits
  Reduced cost of ownership compared to single interfaces thanks to lower outlay for PCB population and channel handling. 3D files, modelling data and customised footprints are free of charge.

Semi-rigid – form-stable microwave cable

Product description

The semi-rigid cable is unique in that it is easily bent to finished shape and still maintains its set after bending. This property makes it ideal for use with automated bending equipment as well as hand forming by bending tools.

There are hundreds of proven applications which include: low-noise amplifiers, a full range of microwave components, aeronautical and space applications and a variety of high-performance laboratory instrumentation.

The semi-rigid cables provide greatly extended environmental parameters. The cables exhibit highly favourable electrical characteristics, particularly an impedance tolerance as low as 0.5 Ohm for a 0.141" diameter cable with nominal impedance of 50 Ohm.

Features and benefits

- Excellent electrical performance: impedance tolerance as low as 0.5 Ohm; minimum VSWR, smooth attenuation vs. frequency curve; minimum change in impedance and attenuation
- Easy to form, strip and solder, making for convenient installation
- Small sizes permit use in high-density areas
- MIL-C-17 qualified

SUCOFORM – handformable alternative to semi-rigid

Product description

SUCOFORM microwave coaxial cables offer distinct mechanical advantages over semi-rigid cables. They are based on the same design as the standard PTFE-insulated semi-rigid cables, but have a tin-soaked copper braid for the outer conductor, giving them outstanding hand-formability. These cables combine the excellent characteristics of semi-rigid cables with those of flexible coaxial cables. Thanks to their small bending radii, they allow space-saving routing and packaging.

Features and benefits

- Excellent properties: low loss, high screening effectiveness, high operating frequency, high temperature range
- Due to the high phase stability over every production run, SUCOFORM is especially suitable for delay lines
- Good flexibility: easy hand forming without tooling; fits into the smallest systems
- Comprehensive connector range; use of standard semi-rigid connectors
- Quick and easy assembly
- Available in long lengths and various versions

SUCOTEST 18 – highest standard of measurement

Product description

SUCOTEST 18 cable assemblies feature excellent electrical performance (low insertion loss combined with unique loss stabilitiy and excellent return loss).

SUCOTEST 18 is ideal for daily use in components and assembly shops, test labs and automatic test equipment applications

Outstanding features

- Applicable at up to 18 GHz
- Low insertion loss
- Excellent VSWR
- Unique loss stability
- There is no cable spring back during measurement procedures; the assembly stays in position.

SUCOFLEX® 100 – high performance cable assemblies

Product description

SUCOFLEX 100 series flexible microwave cable assemblies offer superior electrical and mechanical performance for static and dynamic applications.

This series is a high-end product designed to provide optimal performance at up to 50 GHz, where stringent electrical requirements – in particular stability and low loss – are important. Their mechanical and climate resistance properties surpass those of standard flexible cables. This cable type is ideally suited to test and measurement applications (as test leads) and used in aerospace and defence systems.

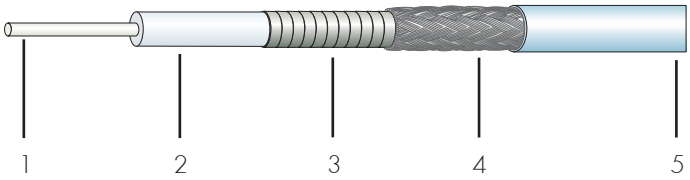

Features and benefits

- The cable maintains stable electrical characteristics when exposed to bending and temperature, enabling reliable test results
- A balanced range of connectors is available, including types which feature NWA-specific interfaces
- Can be provided with various ruggedisations to protect the assembly against different environmental influences
- Available as assembly only

Phase matched standard assemblies

MULTIFLEX 53-02/SUCOFLEX 102

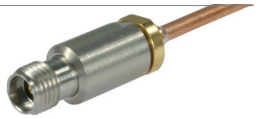

HUBER+SUHNER is offering a comprehensive range of phase matched standard assemblies for the MULTIFLEX 53-02, and SUCOFLEX 102 cables.

Your HUBER+SUHNER representative can provide you detailed information.

Further connector series

For several reasons, only the most popular HUBER+SUHNER connector series and the appropriate connectors for High Speed Digital Testing are mentioned in this brochure. Connector series such as SMA, PC 3.5 etc. belong also to the broad product range of HUBER+SUHNER and are listed below.

Series	Coupling mechanism	Frequency range	
MMCX	snap-on	6 GHz	
MCX	snap-on	6 GHz	
SMC	screw-on	10 GHz	
SMPX	snap-on	40 GHz	
PC 1.85 (1.85 mm)	screw-on	67 GHz	
PC 2.4 (2.4 mm)	screw-on	50 GHz	
SK (2.92 mm standard)	screw-on	40 GHz	
PC 3.5 (3.5 mm)	screw-on	26.5 GHz	
SMA	screw-on	18 GHz	
QMA	quick-lock	18 GHz	
N	screw-on	18 GHz	
QN	quick-lock	11 GHz	

Resistive components

Low power attenuators

Power	0.5 to 2 Watts
Connectors 50 Ω	BNC, N, PC 2.4, SK (2.92 mm standard), PC 7, QN, QMA, SMA, TNC
Connectors 75 Ω	BNC, N
Frequency range	from DC up to 50 GHz
Attenuation range	0 to 40 dB

Low power terminations

Power	0.5 to 2 Watts
Connectors 50 Ω	TNC, SMB, SMC, SMA, QN, QMA, QMA IP68, QLA, PC 7, SK (2.92 mm standard), PC 2.4, N, MMCX, MCX, C, BNC, BMA, 7/16, 1023
Connectors 75 Ω	TNC, N, BMA, BNC, MCX
Frequency range	from DC up to 50 GHz
