Direct Attach Outlet
All-round protection

R&M

R&M*industry* IP 54/67 Direct Attach Outlet
The outlet for tough applications

Damp and dusty. This is where the R&M*industry* IP54 and IP67 boxes feel at home. Both IP levels are available as surface-mount and flush-mount. Suitable for the R&M Cat. 6_A EL, Cat. 6_A and Cat. 8.1 modules as well as the Cat. 6_A coupler.

1 **Quick mounting with direct attach fixation**
Whether surface-mounted or flush-mounted, the IP54/IP67 outlets can be installed in two minutes. R&M simplifies every step.

2 **Front access**
Once mounted, the connection modules remain fixed in the wall. For all further work, the cover enables front access to modules and their wiring.

3 **Labelling**
Connection ports must be recognizable at a glance, especially in harsh environments. The labelling field provides space for the most important information.

4 **Precision**
The pressure distribution and tolerance-free guidance compensate for tension and push of the cables. The plug-in faces of the modules do not jam.

Application areas

R&M*industry* outlets with IP54 or IP67 protection are designed for structured cabling in harsh environments outside offices and homes. They are impact-resistant, UV-resistant and resistant to gasoline and oil. The RJ45 data connections are reliably protected against harmful environmental influences.
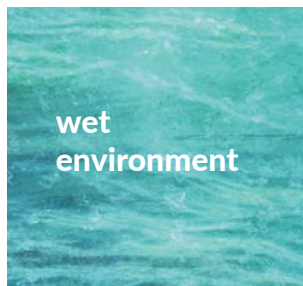

Temperature - 25 °C to +80 ° Water vapor Hot water

- Refrigeration
- Kitchen
- Laundry

Dust of any kind
